

**Errata to *Double Material Segment as the Model of Irregular Bodies***  
**by P. Bartczak and S. Breiter**

**v. 1.0**

Fortunately, I have found only one minor mistake here. Equation (13) has a wrong sign; just remove the minus and all the rest remains correct.

We are still looking for some handy rule to determine the segments lengths and mass ratio. We follow the subject, because the model is fairly nice. More to come soon.
