Footnotes:

[1] Assumed value.
[2] Mean value of two significantly different solutions.
[3] Different spin axis solutions for different apparitions was interpreted as indicating a precessing motion.
[4] Symmetric solution obtained, but quantitative specification is missing.
[5] Consistency check of previous spin vector determinations.
[6] Based on a radar experiment giving constraints on the aspect angle at the time of observation.
[7] Based on two radar experiments giving an aspect circle at the time of observation.
[8] Modelled as a cylinder with hemispherical ends.
[9] Modelled as a cylinder cut out of a sphere.
[10] Complex shape.
[11] Modelled as a Jocobi ellipsoid.
[12] Modelled as 8 octants of ellipsoids put together to form a continous surface.
[13] Modelled as an ellipsoid with a piece removed by a plane cut.
[14] Modelled as an irregular polyhedron.
[15] Modelled as a sphere with free albedo facets.
[16] Results show that there is no significant albedo variegation.
[17] Modelled using a spherical harmonics expansion of the shape.
[18] Albedo model with a single big spot.
[19] Modelled as a sphere with 2 dark regions.
[20] Speckle images showing albedo variegation.
[21] Bi-axial ellipsoid (a/b=1.15) with a flat region just off the South Pole.
[22] Also presented in Ful+91.
[23] Also presented in English in Lup+90.
[24] Also presented in Mi+90c.

[25] Also presented in Det+94.
[26] Detailed model from space images.
[27] Also presented in Mic94.
[28] The spin axis is not aligned with the c-axis of the ellipsoid model.
[29] DEEVE - dynamicaly equivalent equal volume ellipsoid adopted for the complex shape.
[30] Complex radar model.
[31] Convex shape obtained with lightcurve inversion.
[32] Pole coordinates calculated for J2000.
[33] Values for pole coordinates in the paper are 17.238, 11.351
[34] Also presented in Bla+98.
[35] Model requires albedo variegation
[36] Suggested albedo variegations of 4%
[37] Values for pole coordinates in the paper are 128.5, -89.66
[38] Because of latitude close to 90 deg, longitude is ambiguous
[39] Crude approximation of the spin axis orientation
