To whom it may concern

As a co-author of the paper:

Kwiatkowski, T., Kryszczyńska, A., Marciniak, A., Borezyk, W., Masi, G., Galád, A., Goncalves, R., and Colas, F. 2007. Photometry of 2004 RZ164: a probable binary asteroid. 2007. *Astronomy and Astrophysics* 462, 341-344,

I have no objections to dr Tomasz Kwiatkowski using it for his habilitation. The staff of Modra observatory planned and observed an asteroid 2004 RZ164 on Dec 21, 2004. I processed data to obtain a lightcurve from that night and provided them to dr Kwiatkowski for further analysis. I also let him know of other observers of that object in Modra. This was my contribution to the paper.

Adrián Galád
