To whom it may concern

I agree that dr Tomasz Kwiatkowski may use the following paper for his habilitation to assistant professor position:

Kwiatkowski, T., Kryszczyńska, A., Marciniak, A., Borczyk, W., Masi, G., Galad, A., Goncalves, R., and Colas, F. 2007. Photometry of 2004 RZ164: a probable binary asteroid. 2007. *Astronomy and Astrophysics* 462, 341-344

My contribution to this paper was limited to data acquisition. Upon request from dr Kwiatkowski I made photometric observations of 2004 RH120 at the Pic du Midi Observatory in France. After correcting the CCD images for bias and flat-field, I made them available to dr Kwiatkowski for analysis.

Francois Colas

A handwritten signature in blue ink, appearing to read 'Colas', with a long, sweeping underline that extends to the right.
