

27 November 2009

To whom it may concern

I agree that dr Tomasz Kwiatkowski may use the following paper for his habilitation to assistant professor (doktor habilitowany) position:

Kwiatkowski, T., Kryszczyńska, A., Marciniak, A., Borezyk, W., Masi, G., Galad, A., Goncalves, R., and Colas, F. 2007. Photometry of 2004 RZ164: a probable binary asteroid. 2007. *Astronomy and Astrophysics* 462, 341-344

My contribution to this work was limited to taking observations of 2004 RZ164 (Clear, V and R band ccd images) at the privately owned Linhaceira observatory in Portugal and reducing them. The obtained lightcurves were sent to dr Kwiatkowski for further analysis.

Rui Goncalves
